# Challenges of integrating information on multiple values

Local

**WP1**  
Historical context of health and wellbeing value of salt marsh

**WP4**  
Local to national interventions and integration

**WP2**  
Linking coastal habitats to coastal defence

**WP3**  
Valuing changes in human health and wellbeing as a result of interventions applied to salt marsh environments

**WP4**  
Local to national interventions and integration

Quantitative

Qualitative

# Integrating information on multiple values

Key Integration Message:

The sum of the parts is great, but the whole is greater still

“the aim is not to use different disciplines to translate for each other, or to combine results into one metric, but rather to embrace the differences in the approaches and outputs and to explore how they can complement each other”

# The CoastWEB Team
