

VALUING NATURE

Prescribed burning impacts on peatland plant-soil feedbacks

Alice Noble

PhD student, Leeds University

Research area

- Fire impacts on *Sphagnum* moss
- Implications for peatland carbon storage, hydrology, water quality and biodiversity

Business Impact School

- Learn about past/current business impacts
- Insight into how we value nature
- Challenge personal ideas about 'business'

Opportunities and challenges

- **Opportunities**
- Direct benefits e.g. water quality
- Carbon storage – increasing awareness

- **Challenges**
- Land use conflicts
- Communicating results
- Legislation and subsidies
