

VALUING NATURE

Design Method of Ecological
Sustainability for Abandoned
Industrial Buildings (in Northern
China)

Likun Yang

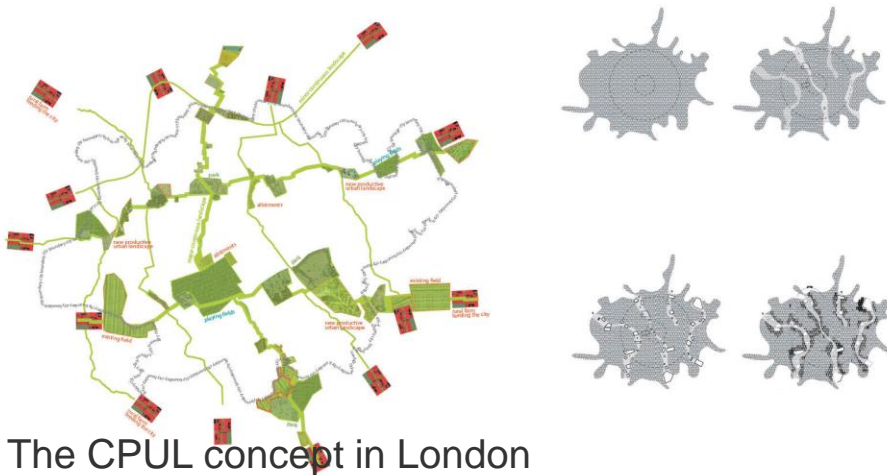

PhD Student

Welsh School of Architecture

Cardiff University

Research Area

- The research aims at proposing design methods to reutilising and resigning deserted industrial factories combined with urban infrastructure, landscape and biotic environment into a whole urban environment for ecologically and socially sustainable development.

The CPUL concept in London

Business Impact School

- To meet more researchers
- To understand nature in economic concept
- To link the research with business and practice.

Opportunities and Challenges

- Commercial use: exhibition hall; vertical farming; landmark
- Balance between nature, business and policy
